Jetaus tu mano, kam Google skirtas, a?

The Limits are:

Motor vehicles first used on or after 1 April 1985:

The light transmitted through the windscreen must be at least 75%.

The front side windows must allow at least 70% of light to be transmitted through them.

If the glass is tinted to a point whereby it lets through less light, the vehicle does not meet legal requirements.

O kur tamsinti, tai bent jau vieta parasyk kur pats gyveni, kad zmones nenurodytu kokio garazo esancio 200 myliu nuo taves :roll:

<http://www.google.co.uk/search?hl=en&q=car+window+Tinting&meta=>

priekinius langus galima mazai tamsinti.

manau tos firmos kurios tuo uzsiima zino tuos reikalavimus. paciam sudetinga lipdyti ta plevele kad nebutu oro burbulu - tikrai reikia stipriu nervu ir daug pleveles.
